GMT idiotypes in biology and medicine pdf - In immunology, Antigens are substances specifically bound by antibodies or T lymphocyte antigen receptors. They are substances that stimulate production of or are recognized by antibodies. Sometimes antigens are part of the host itself in an autoimmune disease.. Antigens are "targeted" by antibodies. Each antibody is specifically produced by the immune system to match an antigen after cells in ...

Antigen - Wikipedia - The adaptive immune system, also known as the acquired immune system or, more rarely, as the specific immune system, is a subsystem of the overall immune system that is composed of highly specialized, systemic cells and processes that eliminate pathogens or prevent their growth. The acquired immune system is one of the two main immunity strategies found in vertebrates (the other being the ... Adaptive immune system - Wikipedia -
