They are an efficient method for avoiding the not invented here (NIH) syndrome. A wide variety of subjects are available from IEC (International Electrical Congress) TC-56 subcommittee for publications (Technical Committee 56 is responsible for dependability issues driven by a strategic policy statement). ZBGB a half a century ago, in 1975, when the International Electrotechnical Commission (IEC) was created, it was decided to establish a committee for the development of standards for the dependability of electrical equipment. This committee is the IEC TC 56, which is responsible for the development of standards for the dependability of electrical equipment. The standards developed by TC 56 are described in the following table:
